

## Online GeoManager Training Center

The Trimble MRM University Learning Center is the central, easy-to-use location to access all GeoManager training.

- **eLearning courses** include interactive elements like guided practices where you can try out what you just learned, and knowledge checks to test your retention.
- **Need Assistance** - Contact [TrainingMRM@trimble.com](mailto:TrainingMRM@trimble.com) for any questions regarding Trimble training or to speak with a Trainer regarding your specific requirements.

All courses are based on real-world GeoManager user roles, with a step-by-step methodology and practical examples. Please go to the Learning Center to browse our course catalog, select eLearning courses to take or request to speak to a Trimble Trainer.

### To Access eLearning Courses:

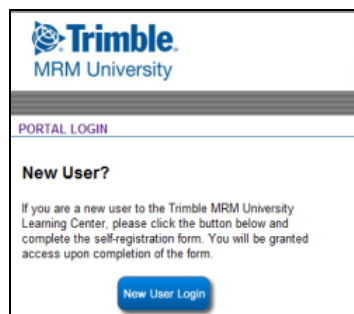

1. Log in to your GeoManager account.
2. Click **Training & Support**.
3. Select the **Training** link.

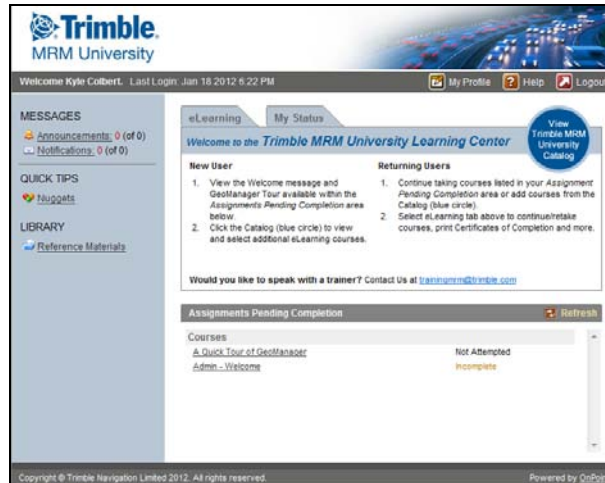

4. Click the link to the Trimble MRM University Learning Center.

5. Log in, or if you are a first time user, click the blue “New User Login” button then complete a short registration form. Be sure to select the “Job Role” that best describes how you intend to use GeoManager. The selection determines the initial set of eLearning courses that are automatically assigned to you.

6. Begin taking eLearning courses listed in the “Assignments Pending Completion” section. A welcome course and a quick tour of GeoManager and based on the role selected during registration will be listed. The welcome course includes recommended courses based on the role you selected and step-by-step instructions for ordering additional eLearning courses.

### About Trimble Fleet Solutions

Trimble Fleet Solutions provide visibility into fleet operations so businesses of all sizes can increase mobile worker productivity, reduce fuel costs, decrease carbon emissions, improve safety and streamline scheduling. Trimble's Fleet Management, Driver Safety, Work Management and Hours of Service solutions are hosted on the GeoManager cloud computing platform, which integrates advanced in-vehicle hardware, GPS location, vehicle diagnostics and wireless technologies for exceptional performance and simplicity of use. Trimble continually invests in innovative technology to meet the needs of customers in diverse markets globally. Visit [www.trimble.com/fleet](http://www.trimble.com/fleet) or call 1-877-728-7623.
