

# Announcing New GeoManager Features

**July 1, 2009**

## Introducing Billing Management

On July 17, 2009, Trimble MRM will introduce the new Billing Management feature for all GeoManager customers. Billing Management allows you to upload billing information for your mobile devices so you can receive a customized bill. Using this feature, you can associate each device with its business cost centers, allowing you to post bills against corresponding cost centers within your organization.

All new and existing GeoManager customers will receive the Billing Management feature. No action is necessary from the customer.

## Now Offering NMEA WiFi

On July 17, 2009, Trimble MRM will offer the new NMEA WiFi feature, which allows you to receive NMEA data on laptops and handheld hardware that are connected to the iLM 3100-W. Using the NMEA WiFi, you can receive real-time GPS data even when you take your computer or handheld from the vehicle.

## For More Information

For more information about Billing Management or NMEA WiFi, please contact a sales representative at 877-728-7623 or your COM.

## About Trimble Mobile Resource Management

Trimble Mobile Resource Management (MRM) is a leading, global provider of end-to-end Mobile Resource Management solutions designed to help businesses optimize fleet performance and the service delivery process by automating the management of their mobile workers, their mobile workers' work and their mobile workers' assets in the field.
