

@Road Portico SM iLM

Cost-effective location management for your mobile workforce

@Road Portico SM iLM[®] delivers a cost-effective, easy-to-use location-enhanced solution. The hosted @Road solution combines leading GPS, wireless, and Internet technologies, enabling you to manage mobile resource activity, improve productivity, and reduce costs. Gain visibility into the daily activities of your mobile team—from actual routes and stops, to location maps and information on-demand. @Road Portico iLM delivers the tools you need to measure overall mobile workforce performance.

Cost Effective

With no IT infrastructure or IT management investment, @Road Portico iLM provides one of the best entry-level, cost effective mobile resource management platforms available. In addition, @Road Portico iLM provides a simple and inexpensive way for businesses to monitor activities featuring easy-to-use dynamic mapping and device status screens.

Business Reports

@Road Portico iLM delivers basic business reports that measure and evaluate mobile resource activity.

Secure Solution, for Secure Mobile Resources

Portico employs a hosted architecture combined with patented @Road LocationSmart[™] technologies and state-of-the-art security—delivering data accuracy, reliability, and integrity. Available on many wireless carrier networks, @Road Portico iLM offers excellent national coverage.

@Road integrates world-class, intelligent, location-relevant, wireless solutions that deliver proven ROI. To learn more about @Road solutions, visit www.road.com
